

SkyTrunk ST-4004

Main Features

- Connect Skype through your office extension phones, no need of microphones, speakers and everyone's PC
- Support maximum 4 independent Skype calls concurrently
- Support 4 FXS ports for Skype application and 4FXO for landline when the corresponding FXS port is not busy
- Support devices cascading up to 16 FXS/FXO ports in one PC
- Support international busy tone
- Only need an unique corporate Skype account for contacts
- Make both Skype and PSTN calls with existing office extension phones
- Support Speed Dial (up to 20 digits) or SkypeOut™ calls directly through the office extension phone keypad dialing
- Receive a PSTN or Skype call in the way as you do with your office extension phones
- Cheese Button: If Skype quality is not good or contact doesn't answer your call Just press "#" key through phone keypad to switch to a presetting SkypeOut or PSTN call (Patent Pending)
- "Just remember extension number for contact": Need to find your colleague? All you need to remember now is his/her extension number.
Ex. Dial "*" + extension "168" no matter he/she is in office or not.
If the connection is bad or no answer, then press a single "#" key (Cheese Button) to dial his/her preset alternative connections (Home, remote office, SkypeOut, ...,etc.) without dialing or memorizing lengthy phone numbers
- Web management
- Easy of use and user friendly interface
- Support CDR (Call Detail Record) for view and back up.
- Support public and private contacts phonebook
- Allow every user to export personal Skype contacts into SkyGW4 private phonebook via web interface (IE, Internet Explorer) .
- Automatically check SkypeOut credit and send notification via SMS for MIS
- Advanced operation administration messages like HW/SW error, Skype/SkypeOut status & call connection status
- Support popular PBXs
