

SMART POWER - 8L

Remote Control Surveillance Management System

- Control Power Switch of Remote Equipment via network or phone voice to replace the presence of the personnel.
- LED panel to inspect total current.
- Support Power Start sequence setting to prevent all of switches from starting simultaneously to cause sudden overloading and effect equipment working.
- Provide 8 sets of accounts and passwords for your own setting to manage different power switches.
- Execute Power On / Off / Reboot via Console to manage its performance.
- Provide remote net firmware to renew the function.
- By brief message and email warning to practice the instant surveillance and warning to important equipment.
- It is equipped with overloading electric breaking protector to avoid overloading to cause device damage.
- Provide API interface. The manager can develop the control software by himself.
- Pre-set Switch Start Time and arrange the working schedule for power supply.
- Auto on / off power switch with surrounding temp. by build-in temp. Sensor.
- Record the user's operating message and abnormal message to provide the user to check the case afterwards.
